

# Grow Program: Turf Culture Based Upon Organic Nutrition

**The Nature's Source Difference:** Nature's Source plant foods are high efficiency nutrition formulated with oilseed extract, an all-natural and renewable source of plant nutrition. The low salt formulations enhance nutrient uptake by the plant.

## Feeding Recommendations

---

**Spring/Summer Program:** Apply Nature's Source Organic 3-1-1 weekly or biweekly at 12 to 16 ounces per 1,000 square feet. Each application provides less than 0.1 pound (1/10#) of nitrogen per 1,000 square feet.

**Fall Application:** Use Nature's Source Organic 3-1-1 at a rate of 32 to 64 ounces per 1,000 square feet in a single application. The high rate provides 0.15 pounds of nitrogen per 1,000 square feet.

**Tank Mixing:** Product is compatible with most new pesticide chemistry. Consult your Nature's Source Technical Representative for combining with other nutrient sources.

**Nature's Source Benefits:** Turf treated with Nature's Source will not display the stress symptoms often caused by conventional, synthetic salt-based fertilizers.

*Superintendents report more compact growth with better green color, stronger lateral growth and improved root development. The turf also recovers more quickly from high traffic. Warm season grasses come out of dormancy greening up earlier in the Spring.*
