

Grow Program: Turf & Greens

The Nature's Source Difference: Nature's Source plant foods are high efficiency nutrition formulated with oilseed extract, an all-natural and renewable source of plant nutrition. The low salt formulations enhance nutrient uptake by the plant.

Feeding Recommendations

When applying Nature's Source 10-4-5, fill spray tank with recommended amount of plant food and then fill the tank. Nature's Source 10-4-5 will mix quickly with the addition of the water.

When nutrition is needed and weather conditions are too wet to add more moisture to the soil it can be applied as a light foliar spray at a rate of 64 ounces per 100 gallons. This will keep nutrition in the plant without adding to the moisture in the soil.

COMPATIBILITY

Nature's Source 10-4-5 is compatible with most liquid plant protection products. Always jar test new combinations before applying. Do not mix Nature's Source 10-4-5 with Copper or other heavy metal products.

TURFGRASS

Greens and Tees: Apply 12.8-26 ounces of Nature's Source 10-4-5 per 1,000 sq. ft. Apply as needed every 7 to 28 days. Rates per acre are 2-5 gallons per acre in 40-100 gallons of water.

Fairways and Lawns: Apply 12.8-40 ounces of Nature's Source 10-4-5 per 1,000 sq. ft. Apply as needed every 7-28 days. Rates per acre are 4-10 gallons per acre in 40-200 gallons of water.

Newly Seeded or Repair of Damaged Turf: Apply 6.4-26 ounces of Nature's Source 10-4-5 per 1,000 sq. ft. with 2-5 gallons of water.

NITROGEN CONVERSION RATE:

The rate of 12.8 ounces of Nature's Source 10-4-5 per 1,000 sq. ft. corresponds with the standard 0.10 lbs. N per 1,000 sq. ft.
